Balija Pavan Kumar

Phone: +91 9533719773 **Email :** pavanls1456@gmail.com

CARRER OBJECTIVES:

I would like to associate myself with a challenging environment that provides opportunities for learning and career advancement. My goal is to excel in this field through hard work, perseverance, and dedication, while making the best use of my key skills, such as active listening, analytical thinking, and problem-solving.

PROFESSIONAL SUMMARY:

- Having 4 years of experience as a Software Developer and Tester in the **ADAPTIVE AUTOSAR PLATFORM and C++**.
- Developed Basic Software Components according to the ADAPTIVE AUTOSAR specifications.
- Designed and implemented sample applications to test AUTOSAR functionality.
- Hands-on experience with ADAPTIVE AUTOSAR configuration tools.
- Exposure to the development and functional testing of **Cryptography**, **ara::core**, and **Diagnostic** modules.
- Strong knowledge of Adaptive AUTOSAR Basic Software Components, including **com, sm, diag, crypto, exec**.
- Involved in testing and validating the Adaptive AUTOSAR stack on QEMU virtual platforms to ensure proper stack functionality.
- Ability to understand customer requirements and functional specifications.
- A proactive team player with strong analytical and interpersonal skills.

TECHNICAL SKILL:

Programming Languages:	C++, C++11/14 and C – Language.
Tools	Visual Studio Code, CANoe, GitHub, Vector Cast Tool, Davinci developer Adaptive tool, Atlassian Tools (Bitbucket, Jira), Code Beamer (ALM), Axivion tool, AWS EC2 Instance, Yocto, QEMU.
Operating System	Linux (Ubuntu), Windows, QNX.
Skills	Adaptive Autosar, Classic Autosar and ADAS.

EDUCATION:

Qualification	Institution	Board/University	Passing year	Marks In %
B.Tech (ECE)	SMEISGI	JNTUA	2020	70.68
Class XII	GOVERNMENT JUNIOR COLLEGE	BOARD OF INTERMEDIATE, AP	2016	87.9
Class X	S R K MPL BOYES HIGH SCHOOL	BOARD OF SECONDARY, AP	2014	80

PROFESSIONAL EXPERIENCE:

- **KPIT Technologies Ltd** (Oct/24/2024 – Present) – Sr Software Engineer – Adaptive AUTOSAR
- **AVIN Systems Pvt Ltd** (July/15/2021 – Oct/23/2024) – Sr Software Engineer – Adaptive AUTOSAR

AWARDS:

- **Thankyou Award**, AVIN Systems Pvt Ltd, Dec 2023.
  Description: Completing activities with minimal guidance.
- **Excellence Award**, AVIN Systems Pvt Ltd, Jan 2024.
  Description: Having an ability to maneuver through multiple domains with commitment & dedication.
- **Above & Beyonders Award**, AVIN Systems Pvt Ltd, Jan 2024.
  Description: In recognition and appreciation of outstanding performance and contribution for the project.

PROJECTS UNDERTAKEN:

PROJECT 1:

ProjectName	**Integration of DIGNOSTIC Stack**
Project Description	Bug fixing and Implementation of overall **DIAGNOSTIC** according to AUTOSAR specification and customer requirements.
Contribution	**My responsibilities included:** ➢ Analysis of customer requirements from the AUTOSAR Diagnostic specifications doc. ➢ Unit testing of entire Diagnostic stack using vector cast tool. ➢ Fixed all defects of Diagnostic stack. ➢ Fixed all static violations in Diagnostic stack. ➢ Involved ASPICE activities.
Tools Used	Visual Studio Code, Ubuntu, JIRA, CANoe, GitHub, Vector Cast Tool, Davinci tools.

PROJECT 2:

ProjectName	**ARA: CORE Development of Adaptive Platform**
Project Description	Implementation and integration of overall Adaptive AUTOSAR FC's according to AUTOSAR specification and customer requirements. **Adaptive ara::core** is one of the module used to provide the advance C++ libraries to all AUTOSAR modules.
Contribution	**My responsibilities included:** ➢ Analysis of requirements from the AUTOSAR Adaptive **ara::core** SWS document of 20-11. ➢ Unit Testing of **ara::core** according to the development code. ➢ Integration Testing of **ara::core** according to the development code. ➢ Written the Sequence diagram scripts and generating the sequence diagrams using PlantUML. ➢ Fixed the static violations in Adaptive Core development code.
Tools Used	Visual Studio Code, Atlassian Tools (Bitbucket, Jira), Code Beamer (ALM), GitHub, Axivion tool, JIRA.

PROJECT 3:

ProjectName	**Cryptography Development of Adaptive platform**
Project Description	Implementation and integration of overall Adaptive AUTOSAR FC's according to AUTOSAR specification and customer requirements. **Cryptography** is one of the modules used to provide cybersecurity of the applications in the vehicle from the hacker attacks and to verify the authenticity and integrity of the data.
Contribution	**My responsibilities included:** ➢ Analysis of requirements from the AUTOSAR Cryptography SWS document of 20-11. ➢ Implementation of Cryptography FC according to AUTOSAR_SWS_Cryptography PDF specifications. ➢ Configuration of interfaces for Cryptography on ASTRA configuration tool. ➢ Implementation of basic applications to invoke the Cryptography API's. ➢ Functional Testing of Cryptography according to the development code. ➢ Written the Sequence diagram scripts and generating the sequence diagrams using PlantUML. ➢ Fixed the static violations in Cryptography development code.
Tools Used	Visual Studio Code, Davinci developer Adaptive tool, Atlassian Tools (Bitbucket, Jira), Code Beamer, GitHub, Axivion tool.

PROJECT 4:

ProjectName	**Testing and Validation of Adaptive AUTOSAR Stack on Virtual Platforms**
Project Description	Involved in testing the Adaptive AUTOSAR stack on **QEMU** environments. The project required ensuring that the stack worked as expected in these environments, identifying any issues, providing solutions, and documenting the changes encountered. This also included testing the stack's performance, functionality, and integration with the virtual platforms.
Contribution	**My responsibilities included:** ➢ Tested the Adaptive AUTOSAR stack on QEMU environments. ➢ Ensured proper functionality and performance of the stack in virtual environments. ➢ Identified defects, troubleshooted issues, and provided solutions. ➢ Used Yocto to build the stack and generate the ext4 file and kernel image. ➢ Uploaded the generated ext4 file and kernel image into the virtual environment. ➢ Documented the challenges and solutions faced during the process. ➢ Worked with AWS EC2 instance for remote access and testing of the environment.
Tools Used	Visual Studio Code, AWS EC2 Instance, Ubuntu, Yocto, QEMU.

STRENGTHS:

- Positive Learning Attitude.
- Dedication and Flexible to work.
- Team Worker.
- Good listener and communicator.
- Quick Learner.

DECLARATION:

I do hereby declare that the particulars of information and facts stated here in above are true, correct and complete to the best of knowledge and belief.

Yours sincerely
Balija Pavan Kumar
